

## ***On-Site Power Systems***

---

### STANDBY

From powering water pumping stations in Angola to providing emergency power for Yellowstone National Park, KOHLER's extensive line-up of Standby/Prime generators power airports, hospitals, factories, and communications centers that knit together a global marketplace.

Individual units range from 8.5kW to 2000kW, gas or diesel fueled, 50 or 60 hertz, available with a complete compliment of accessories. (Weather housings, sub-base fuel tanks, block heaters, sound attenuation options, critical silencers, etc.)

Ideal for Standby emergency power, Interruptible Rate applications, Peak Shaving to lower energy costs, or Prime power installations for heavy construction and mining operations, KOHLER will engineer a power system to meet your requirements.

---

With units 20kW to 275kW Kohler has a solid line-up of natural gas units with the ability to meet increasingly stringent global emissions standards.
