CONTINENTAL "R"

Series Engines

Models in the liquid-cooled CONTINENTAL "R" Series are designed for a wide range of equipment applications requiring engines in the middle power ranges with high-speed capabilities. There are at present 2 models in the line, offering 35 and 47 hp. Both the models are four-cylinder and feature the overhead valve design.

RATED HORSEPOWER OUTPUT AT GIVEN RPM									
Model	Cyl.	Bore (mm)	Stroke (mm)	Displ.	HP @ 1800	HP @ 2400	HP @ 3000	HP @ 3600	Torque Fr.-Lb. @ RPM
R11	4	70	72	1.1L	18.6	25.9	31.6	35	58 @ 2500
R14	4	76	77	1.4L	24.7	34.7	41.7	47	76 @ 2400

Engine ratings for CONTINENTAL "R" series models are gross brake power per ISO 1585. Converted to standard conditions of 29.21 in. Hg (996hPa) dry barometric and 77°F (25°C).
